Requirements for the Use of Face Coverings and Masks

June 26, 2020

North Carolina took early and aggressive action to slow the spread of COVID-19 in our state. These actions prevented our healthcare systems from being overwhelmed and provided valuable time to build our state’s capacity to respond to this crisis. Now, we are seeing increasing cases and hospitalizations from COVID-19 across our state. With more North Carolinians leaving their homes as we ease restrictions, the risk for COVID-19 exposure and infection increases.

We have important goals: to protect our families, friends and neighbors from getting seriously ill, to restore our economy and get people back to work, and to get our children back to school. To attain these goals, we must remain vigilant and continue to work together to combat the spread of COVID-19 by taking preventive actions to slow the spread of COVID-19. The preventive actions include the 3 Ws: Wear a cloth face covering. Wait 6 feet apart from others. Wash your hands.

Over the past few months, we have learned a lot about COVID-19 transmission. We know now that people who are infected, but do not have symptoms, can infect others by spreading respiratory droplets through activities like speaking, coughing, laughing, and singing. New scientific evidence suggests that public use of face coverings can help reduce disease transmission. Face coverings are not a substitute for other important prevention practices and should be used in addition to staying 6 feet apart, washing hands, and staying home when ill.

This document updates existing NC DHHS guidance for the use of face coverings by the general public when outside the home. It mandates that face coverings be worn statewide as outlined below. It is not a substitute for existing guidance about social distancing and handwashing.

Guidance for People

People must wear face coverings when in public places, indoor or outdoor, where physical distancing of six (6) feet from other people who are not members of the same household or residence is not possible. These settings include, but are not limited to:

- Inside of, or in line to enter, any indoor public space, including public schools;
- Waiting for or riding on public and private multi person transportation, including but not limited to buses, taxis, ride sharing, private care service, vans;
- Engaged in work, whether at the workplace or performing work off-site, when they are or may be within six (6) feet of other people, including working in or walking through common areas, such as lobbies, hallways, stairways, elevators, and parking facilities;
• Obtaining services in a healthcare setting;

• While outdoors in public spaces when maintaining a physical distance of 6 feet from persons who are not members of the same household or residence is not feasible.

This restriction does not apply to persons while inside their residence or the personal residence of another. Face coverings may be removed to participate in a religious ritual.

**Guidance for Businesses**

Certain businesses are required to have patrons and employees wear face coverings whether they are inside or outside when they are or may be within six (6) feet of another person, or unless an exception applies. Specific occupational settings, including health care settings, should continue to follow existing protocols and require surgical or procedure masks or N95 respirators, as indicated.

These businesses must follow the requirements for face coverings as described in Executive Order 147. These businesses, to the extent they are open are:

• Retail Businesses;
• Restaurants
• Personal Care, Grooming, and Tattoo Businesses;
• Child Care Facilities, Day Camps, and Overnight Camps;
• Gyms, Exercise Facilities, and Fitness Facilities,
• State Government Cabinet Agencies;
• Transportation;
• High-Density Occupational Settings Where Social Distancing is Difficult, including manufacturing settings, construction sites, and migrant farm or other farm settings;
• Meat or Poultry Processing Plants (new surgical mask requirement);
• Long Term Care Facilities (new surgical mask requirement);
• Other Health Care Settings (ongoing adherence to CDC guidance)

**Exceptions.** Face Coverings do not need to be worn by an individual, worker, customer, or patron who:

1. Has a medical or behavioral condition or disability and cannot wear a face covering (including, but not limited to, any person who has trouble breathing, or is unconscious or incapacitated, or is otherwise unable to put on or remove the face covering without assistance);
2. Is under eleven (11) years of age;
3. Is actively eating or drinking;
4. Is strenuously exercising or swimming;
5. Is seeking to communicate with someone who is hearing-impaired in a way that requires the mouth to be visible;
6. Is giving a speech for a broadcast or to an audience;
7. Is working at home or alone in a vehicle;
8. Is temporarily removing his or her Face Covering to secure government or medical services or for identification purposes;
9. Would be at risk from wearing a Face Covering at work, as determined by local, state, or federal regulators or workplace safety guidelines;
10. Has found that his or her Face Covering is impeding visibility to operate equipment or a vehicle; or
11. Is a child whose parent, guardian, or responsible person has been unable to place the Face Covering safely on the child’s face.
12. Children under two (2) years of age should not wear a face covering.

Frequently Asked Questions

What is a cloth face covering?
A cloth face covering is a material that covers the nose and mouth. It can be secured to the head with ties or straps or simply wrapped around the lower face. It can be made of a variety of materials, such as cotton, silk, or linen. A cloth face covering may be factory-made or sewn by hand or can be improvised from household items such as scarfs, T-shirts, sweatshirts, or towels. Ideally, a face covering has two (2) or more layers. These face coverings are not intended for use by healthcare providers in the care of patients. Surgical Masks, Procedure Masks, and N95 respirators are not recommended for general public use or use in community settings, as these should be reserved for specific high-risk occupational settings, healthcare providers and other medical first responders in a health care setting.

When should I wear a cloth face covering?
You should wear face coverings when in public places, particularly when those locations are indoors or in other areas where physical distancing is not possible.

How should I wear a cloth face covering?
Be sure to place the face covering over your nose and your mouth and keep it in place at all times while you wear it. Be careful not to touch your eyes, nose, and mouth when removing or adjusting a face covering and wash hands immediately after removing or adjusting.

How should I care for a cloth face covering?
Wash your cloth face covering frequently, ideally after each use, or at least daily. Have a bag or bin to keep cloth face coverings in until they can be laundered with detergent and hot water and dried on a hot cycle. If you must re-wear your cloth face covering before washing, wash your hands immediately after putting it back on and avoid touching your face. Discard cloth face coverings that:
- No longer cover the nose and mouth
- Have stretched out or damaged ties or straps
- Cannot stay on the face
- Have holes or tears in the fabric

How well do cloth face coverings work to prevent spread of COVID-19?
Scientific evidence suggests that use of cloth face coverings by the public during a pandemic can help reduce disease transmission. Cloth face coverings can reduce the release of infectious particles into the air when someone speaks, coughs, or sneezes. Cloth face coverings are not a substitute for staying six (6) feet apart, washing hands, and staying home when ill.

**Do I need to wear a face covering while exercising outdoors?**
No. If you are able to safely maintain at least six (6) feet distance from others, you do not need to wear a face covering when exercising outdoors.

**Should children wear cloth face coverings?**
Cloth face coverings should NOT be put on babies and children under the age of 2 because of danger of suffocation. Children over the age of 2 should wear cloth face coverings if they can reliably wear, remove, and handle cloth face coverings throughout the day.

**What if I am a person with hearing loss and am concerned about not being able to read lips?**
Deaf and Hard of Hearing people often use lipreading to help understand what those around them are saying. When people are wearing cloth face coverings, other communication strategies are needed. Try finding a cloth face covering that has a clear plastic area that allows the lips to be visible, writing notes back and forth, writing on a white board to communicate, using a free speech to text app on mobile device, and gesturing – or if needed stepping several additional feet back from the person and removing face cloth face covering long enough to communicate.

**What if I am a person with, or I support someone with a disability who cannot wear a face covering?**
Some people may have trouble breathing or sensitivity to having something placed over their face. If you or someone you support is unable to wear a cloth face covering, be sure to take other steps to help avoid unnecessary exposure.

**What if I am worried about being profiled or being subjected to bias if I wear a cloth face covering?**
Some people may experience increased anxiety and fear of bias and being profiled wearing face coverings in public spaces – but wearing a cloth face covering protects your family, friends and neighbors. If you are the target of ethnic or racial intimidation as the result of adhering to the face covering provision or as a result of the pandemic, you are strongly encouraged to report the matter to law enforcement or other government entity. Everyone should be able to wear cloth face coverings without fear of profiling or bias, and any type of racial intimidation, profiling or bias for wearing a face covering should not be tolerated.
